with passionate voice gives modern singers of renaissance music the tools to learn and
master the art of re creative singing providing a much needed historically informed
perspective author robert toft discusses the music of composers ranging from marchetto
cara to john dowland in the context of late renaissance rhetoric modal theory and
performance traditions

bel canto or beautiful singing remains one of the most elusive performance styles
vocalists strive to master during the eighteenth and early nineteenth centuries
composers routinely left the final shaping of recitatives arias and songs to performers
and singers treated scores freely so that inexpressively notated music could be turned
into passionate declamation in other words vocalists saw their role more as one of re
creation than of simple interpretation familiarity with the range of strategies prominent
singers of the past employed to unlock the eloquent expression hidden in scores

enables modern performers to take a similar re creative approach to enhancing the texts before them in this first ever guide to bel canto author robert toft provides singers with the tools they need not only to complete the creative process the composer began but also to bring scores to life in an historically informed manner replete with illustrations based on excerpts from italianate recitatives and arias by composers ranging from handel to rossini the book offers discussions of the fundamental principles of expressive singing each section including a practical application of the techniques involved drawing on a wealth of documents from the era including treatises scores newspaper reviews and letters this book captures the breadth of practices singers used in the bel canto period complete with six scores recitatives and or arias for performers to personalize through the old methods and a companion website offering demonstrations of the principles involved bel canto is an essential resource for any singer or vocal instructor wishing to explore and master historical techniques of interpretation and re creation from the eighteenth and early nineteenth centuries

this book establishes the principles of interpretation that singers active in england both foreign and english applied to recitatives arias and songs by composers such as handel mozart and rossini expression lay at the heart of persuasive singing during the late eighteenth and early nineteenth centuries and robert toft here ably places the concept and its practices in a broad cultural perspective singing was related closely to speaking in this period when the techniques of delivery that were common to both arts emphasis accent tone of voice pauses breathing and gesture are combined with resources peculiar to singing portamento messa di voce tempo rubato vibrato and ornamentation the style which emerges differs markedly from that of the late twentieth century most singers today perform the repertoire of the late eighteenth and early nineteenth centuries but until now no book has addressed the principles which governed song performance in this period or shown how historical understandings may be used to move and delight modern audiences
